Art Unit: 2665

1. Applicant's arguments with respect to claims 1-4, 29-33, 39-41 have been considered but are moot in view of the new ground(s) of rejection regarding the GERSZBERG et al. reference with different interpretation of elements meeting the claimed limitation.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-4, 29-33, 39-41 rejected under 35 U.S.C. 102(e) as being anticipated by GERSZBERG et al. in U.S. Patent No. 6,229,810 (of record).

By interpreting the customer premise equipments (10) as the claimed data network telephones, the combination of intelligent service director (22) and facility management platform (32) as the claimed call service provider, access network server complex (38) as the claimed terminal emulator, and the network server platform (36) as the claimed service proxy, GERSZBERG et al. discloses a network intelligence for a data network, for setting up services between the data sources and data network telephones (see col. 6, line 14 to col. 9, line 4, Figure 1 and Figure 6) as in claims 1-4, 29-33, 39-41.
